VS.2e  How American Indians Adapted to the Climate and Environment

American Indians: Adapting to the Climate and Environment

Spring  Summer  Fall  Winter

Teaching Tips: Make a hot dog fold with a 1" tab uncovered along the side. Cut the overlapping section to make 4 flaps. Glue the title in the 2" tab. Glue the 4 seasons on flaps, one per section. Students write how the Indians adapted under each flap, adding details or add drawings to describe each weakness. Or, teachers may choose to use the pre printed information on the next page for some students. For details, See page 8 of the Curriculum Framework.
| Consider | They fished and picked berries. | They grew crops like beans, corn, and squash. | They harvested crops. | They hunted birds and animals. |
